

## TG-A series product announcement

The continued advancement of the technology industry has seen a sharp rise in market demands for improved thermal management solutions which often means that thermal interface materials are upgraded as new products and technologies are developed and brought to market.

Heat dissipation is a key area for many industries and manufacturers from a range of disciplines require higher performance products with increased conductivity, often coupled with the need for smaller components or surface areas to offer improved functionality, faster processing and extended life cycles.

In addition to improved performance, companies are also looking for more and more environmentally sustainable products and manufacturing processes.

T-Global Technology is committed to continually improving and developing its range of thermal interface materials to ensure our customers benefit from market leading solutions for their heat dissipation challenges and sustainability targets.

T-Global's TG-A series is our latest product range which offers high performance alongside great value as well as being fully compliant with all industry-standard regulations and certifications. The TG-A series also benefits from a reduced carbon footprint by using more environmentally friendly materials and manufacturing processes.

The table below lists existing product lines which are now not recommended for new design, alongside our recommended alternatives from our new TG-A series:

Comparison Table

Item	GT15	GT20	GT30	TG2030	TG4040	TG4040F	TG4040LC	TG6050
Alternative	TG-A20KF / TG-A38KF / GT10D / TG-ALC			TG-A3500	TG-A4500	TG-A4500F	TG-A4500F / TG-A6200LC	TG-A6200

Item	TGX	L37-3	L37-3F	L37-3S	L37-3L	L37-5	L37-5S
Alternative	TG-A1250	TG-A20KF / TG-A3500F	TG-A20KF / TG-ALC / GT10D	TG-A3500	TG-A3500	TG-A20KX	TG-A3500

Item	H48-2	H48-2K	H48-6	H48-6G	H48-6S	Li98	A96AB	S720 / S730
Alternative	TG-A3500 / TG-A20KX	TG-ALC	TG-A3500 / TG-A38KX	TG-A6200	GT10D / TG-ALC	TG-T1000	TG-AE15AB	TG-A09AB

Customers are advised that if their preferred product is listed above and is already being used in existing production lines to contact us for a repeat order and a member of our technical sales team will be more than happy to assist.
